

SOLID HEAD

A TECHNOLOGICAL BREAKTHROUGH

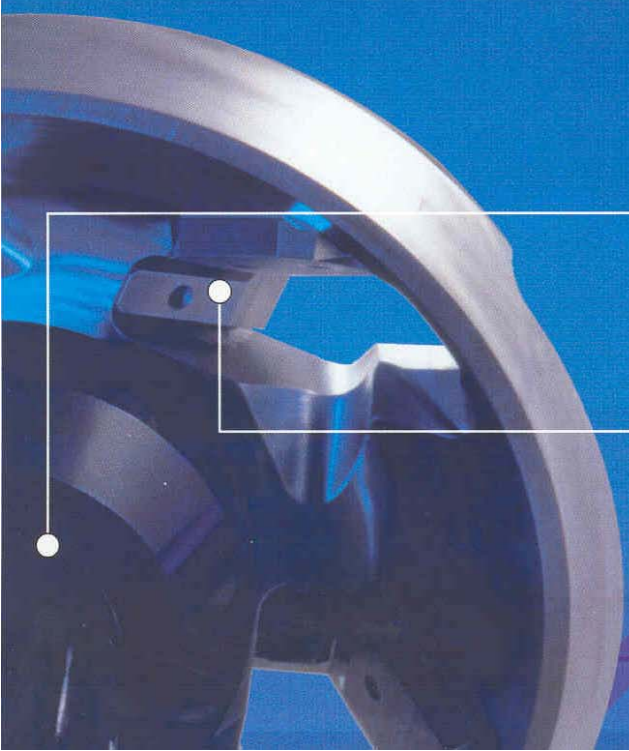

SOLID HEAD FOR DDM and other types of canter

On The Cutting Edge

New generation **TurnKnife III** optimized for canter heads provides for improved chipping performance (better board finish, improved chip quality)

Fully cammed outer surface provides for maximum surge limiting control and lateral stability

Interchangeable left and right parts (clamps, holders and knives)

Mounting arrangement on drive shaft uses B-LOC® locking assemblies for easy head assembly and disassembly

Underside mounting of knife assemblies permits unobstructed chip flow
