Interchangeable left and right parts (clamps, holders and knives).

Lightweight components for easy maintenance and higher rotation speeds.

Lightweight precision ground TurnKnives provide the longest knife life possible.

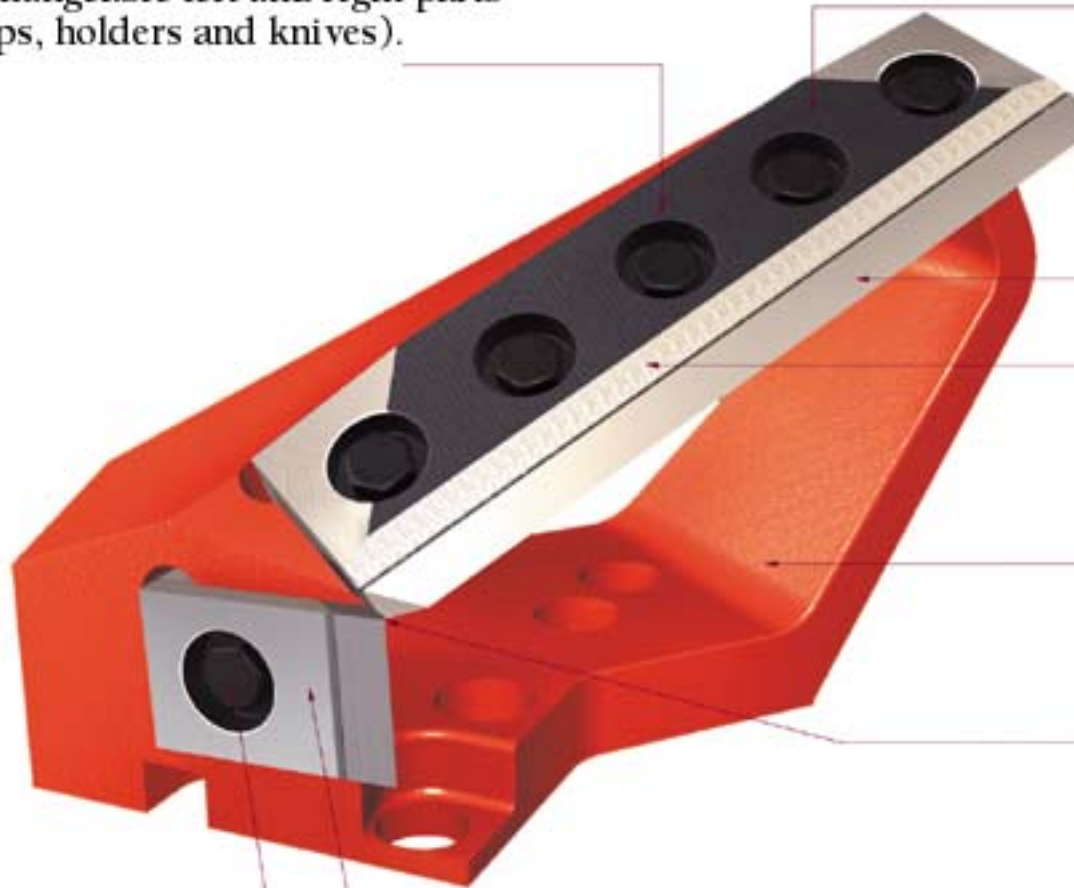

Swept forward design for smoother cutting action.

Efficient adapter shape for clean chip discharge.

Fixed knife placement through secure face assembly adjustment.

Precision components for accurate knife locations.

Special high tensile knife bolts lock knives in place and allow for easy knife changes.

TURNKNIFE® FEATURES

- No grinding
- No babbitting
- Superior blade quality
- Precise knife settings
- High quality components
- Fixed-knife adjustment mechanism

TURNKNIFE® BENEFITS

- Reduced file room cost
- Safer working environment
- Fewer knife changes
Cleaner cut lumber and chips
- Smoother board finish
Improved machine accuracy
- Lower maintenance
- Reliable knife settings

Improved cutting performance increases yield and profits.

TurnKnife® for Canters results in improved surface finish with increased cutting accuracy. Such added performance not only improves lumber recovery, but allows for a reduction in green target settings and higher chip yield. Further, accurately cut cant surfaces ensure precise lumber production throughout the entire breakdown process.
